

Aqualyze Rapid

Why choose Rapid...

- ★ Easy, quick change cartridge replacement
- ★ A versatile system with inexpensive costs

Enjoy 'bottle-tasting' water straight from the tap, eliminate the need for slow-filtering jugs or large space-consuming bottles..... choose the Aqualyze Rapid, from the range of under-sink water filtration systems.

This ergonomically designed drinking water system incorporates a 'rapid-change' cartridge feature and has the added benefit of DIY installation, making it an all-round user-friendly option. The Aqualyze Rapid is a smart, compact system, with integral bracket and few components, designed to take-up minimal under-sink space whilst still being robust and versatile.

Because water quality varies around the country, and consumers have different requirements, Aqualyze Rapid has a choice of 3 system options:- the first (AR1) for all-round protection (designed to also tackle cryptosporidium, cysts and lead), the second (AR2) for soft water areas and the third (AR3) for hard water areas (which includes a scale control function). All three systems remove bad taste, odour and chlorine.

- Cartridge changing performed in seconds with this unique 'push and twist' system
- Step-by-step instructions for installation
- Inexpensive system with versatile options and low running costs
- Complete kit, including tap
- 1 year warranty
- Helpline available

DIY IN/STALL

Filter cartridge pushes up into the bracketed head (pictured left), twists and locks into place which then re-opens the water supply to the system.

Aqualyze Rapid remover: 🚰 bad taste 🚰 odour 🚰 chlorine 🚰 scale* 🚰 cryptosporidium [△] 🚰 cysts [△] 🚰 lead [△]

System components

- 1 x Aqualyze Rapid filter cartridge & bracketed head
- 2 x Fixing screws
- 1 x Tap with fittings kit
- 1 x Saddle valve
- 2 x Lengths of tubing (mains → filter / filter → tap)

Technical information

Installation

The user-friendly design and versatility of the Aqualyze Rapid makes this system a popular choice with DIY enthusiasts, plumbers and even those who don't embrace DIY. Installation requires no shutting-off of water supply or cutting of pipes, includes simple componentry and instructions and requires minimal equipment, hence an easy DIY assembly for either yourself or your plumber.

Filter Cartridge

The filter cartridge in this system requires replacing at regular intervals (see chart below for details). Exhausted cartridges are easily replaced within seconds, due to the unique 'push and twist' design of this system.

Cartridge Capacity/Life:

ARF1 - 1890 litres or 6 months
 ARF2 - 9460 litres or 6 months
 ARF3 - 6435 litres or 6 months

Flow:

ARF1 - 1.9 litres/minute
 ARF2 / ARF3 - 2.8 litres/minute

Water Pressure:

Minimum - 30 psi (2.1 bar)
 Maximum - 125 psi (8.62 bar)

Temperature:

Filter cartridge to be installed on cold water lines only - temperatures must not exceed 100° F (37.2° C)
